

## Using the template Bots

I've installed the XTYPO bot that will allow nice looking markup in articles . Bot are called into content within joomla simply by using the standard bot call procedure. For example {botname} place your content here {/botname} will call a bot into action and work on your content. See me if you have problems.Â

Use the read more function in this article to see the usage of XTYPO.

best CB

**Xtypo** is a **Nice Web 2.0 CSS Styling** from any text in your joomla articles. All you have to do is just insert the xtypo string into your joomla text/content then the text will be showed in a nice CSS styling at your joomla frontend.

Besides being easy, each xtypo styling is **fully configurable**, so you can modify the styling to suit with you need.

### Usage Instructions

To apply xtypo styling to your content use the following strings.

**{xtypo\_alert}**Don't forget to addÂ "{" and "}" to open and close the tags **{/xtypo\_alert}**

**xtypo\_alert** this is xtypo alert **/xtypo\_alert**

This string as default will produce a css style like this :

**{xtypo\_alert}** this is xtypo alert **{/xtypo\_alert}**
